Ford T6.2 — Ford
The Amarok is co-developed with and built by Ford on the Ranger in Silverton (ZA). — SAME VEHICLE, DIFFERENT BADGES

- VOLKSWAGEN **Amarok** 5.35 m Diesel AWD
- FORD **Ranger** 5.37 m Petrol · Diesel · PHEV AWD

What counts. A family is drawn when models of at least two brands, or of two companies, share a platform in the same vehicle class. Same-brand derivatives (BMW X1/iX1, Volvo XC40/EX40/EC40) share one tile. Platform relatives in other classes (for example the Peugeot 3008 and 5008) are not linked on this poster.

Sources. Line-ups from the brands' Swiss and German model pages and press releases, checked against European trade press; twin and platform links cite manufacturer statements or trade press. Brand countries from Wikipedia (head offices, checked 2026-11-01). Checked 2026-10-22; errors are possible for models launched or withdrawn shortly before.

Pictures from carsized.com, otherwise from manufacturer websites, press libraries and configurators, cut out and scaled. Interactive chart (QR code): **car-chart.forestraven.net**. The story behind it: blog.forestraven.net/index.php/same-car-different-badge-a-chart-of-every-car-on-sale-in-europe
